About Us

At **A&J Fire Control Services**, we are dedicated to delivering top-tier solutions for both fire safety and security. Our range of services includes fire fighting equipment, fire alarm systems, and fire hydrant systems to ensure comprehensive protection against fire hazards. We also provide advanced FM 200 systems and smoke detector devices for quick and effective fire suppression.

In addition to fire safety, we offer cutting-edge security solutions such as CCTV security cameras, time attendance machines, electric door locks, and metal detector devices to keep your premises secure. Whether you're looking for a complete home security system or specialized fire protection, A&J Fire Control Services is committed to providing reliable, innovative products tailored to your needs.

Our Mission

Safety First, Always

Our mission is to offer the highest standard of fire protection and security systems, ensuring complete peace of mind for our clients.

Fire Fighting Cylinders

Portable fire suppression units designed to quickly control and extinguish fires, essential for immediate response in emergencies across homes, businesses, and industrial sites.

Personal Protective Equipment

Road Safety Equipment

Road Breakers

Heavy-duty tools used for breaking up concrete, asphalt, and hard surfaces during construction and roadwork, ensuring efficient and precise demolition. Ideal for infrastructure projects and repair work.

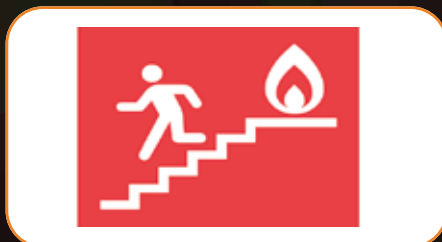

Road Signs

Clear and durable signage used to guide, inform, and regulate traffic, ensuring safety and organization on roads and construction sites. Essential for directing drivers and pedestrians in various environments.

Fire Exit Sign

Highly visible signage that indicates the nearest exit in case of a fire or emergency, guiding occupants safely out of the building. Essential for enhancing evacuation routes and ensuring compliance with safety regulations.

Macron Mobile Foam Unit

A portable fire suppression system designed to quickly deploy foam to control flammable liquid fires. Ideal for industrial sites, it provides rapid and effective fire-fighting capabilities in emergencies.

Fire Blanket

A simple yet effective fire safety tool designed to smother small fires by cutting off the oxygen supply. Ideal for kitchens, homes, and workplaces for quick emergency use.

Safety Glasses

Protective eyewear designed to shield your eyes from debris, chemicals, and hazardous materials. Essential for workplace safety in industrial, construction, and laboratory environments.

Safety Helmet

A durable, impact-resistant helmet designed to protect your head from falling objects, debris, and other hazards. Essential for ensuring safety in construction, industrial, and hazardous work environments.

Safety Mask

A protective mask designed to shield the wearer from inhaling harmful dust, chemicals, or airborne particles. Essential for ensuring respiratory safety in industrial, construction, and healthcare environments.

Safety Jacket

A high-visibility jacket designed to keep workers easily seen in low-light or hazardous conditions. Essential for ensuring the safety of construction workers, road crews, and industrial personnel.

Safety Harness

A secure harness system designed to protect workers from falls by safely anchoring them in elevated or hazardous environments. Essential for construction, roofing, and industrial jobs where height safety is critical.

Breathing Apparatus

A device providing clean air to the wearer in hazardous environments where oxygen is limited or contaminated. Essential for fire fighting, industrial work, and emergency response to ensure safe breathing conditions.

Safety Shoes

Durable footwear designed to protect feet from impacts, punctures, and heavy loads. Essential for workers in construction, manufacturing, and other hazardous environments to ensure foot safety and comfort.

Safety Gloves

Protective gloves designed to shield hands from cuts, abrasions, chemicals, and other hazards. Essential for ensuring hand safety and dexterity in various industrial, construction, and laboratory settings.

Portable Fire Pump

A lightweight and powerful fire-fighting tool designed to provide high-pressure water flow in emergencies. Perfect for areas without a fixed water supply, offering mobility and rapid response.

Fire Hose

A durable, high-pressure hose designed to deliver water or fire retardant during fire-fighting operations. Essential for quickly controlling and extinguishing fires in residential, commercial, and industrial settings.

Fire Sprinkler System

An automatic fire suppression system that detects and extinguishes fires by dispersing water or fire retardant through a network of pipes and sprinklers. Essential for protecting buildings and ensuring quick response to fire emergencies.

Fire Hydrant Valve

A critical component in a fire hydrant system that controls the flow of water during a fire emergency. It allows firefighters to access and direct water to extinguish fires effectively and efficiently.

Hydrant Nozzle

A vital attachment for fire hydrants that directs and controls the flow of water or fire suppressant. It allows firefighters to adjust the spray pattern and pressure for effective fire suppression.

Pillar Hydrant

A vertical, stand-alone fire hydrant installed on streets or property perimeters, designed for easy access to water for firefighting. It features a robust structure for reliable water supply and quick deployment in emergencies.

Fire Hydrant System

A high-capacity fire suppression solution designed to supply water instantly for large-scale fire emergencies in industrial and commercial buildings.

FM 200 System

A clean, non-toxic fire suppression system that quickly extinguishes fires without damaging sensitive equipment, ideal for data centers and critical facilities.

Fire Doors

A complete solution for protecting your home, combining motion sensors, cameras, and alarms for round-the-clock security.

Home Security System

A complete solution for protecting your home, combining motion sensors, cameras, and alarms for round-the-clock security.

Metal Detector Device

Highly accurate devices used for threat detection at entrances and security checkpoints, ensuring a safer environment.

Time Attendance Machine

Smart biometric and card-based systems that accurately track employee attendance and work hours, improving workforce management.

Electric Door Lock

Automated, keyless door locks that enhance security by controlling access to restricted areas with ease and reliability.

CCTV Security Cameras

High-definition surveillance cameras that offer 24/7 monitoring, helping to deter intruders and ensure constant security for your premises.

Smoke Detector Device

Sensitive smoke detection devices that provide early warnings of fire, allowing for immediate action and increased safety.

Fire Alarm System

Advanced fire detection systems that provide immediate alerts, ensuring rapid evacuation and reducing fire risks.

Safety Light

A bright, durable light designed to improve visibility in low-light or hazardous conditions. Essential for construction sites, roadworks, and emergency situations, ensuring enhanced safety and clear guidance in dark environments.

Beacon Sounder

A combined visual and audible alert device used to signal emergencies. It emits loud alarms and bright flashing lights, ensuring clear warnings in noisy or hazardous environments, ideal for fire and security systems.

Alarm Call Point

A manual fire alarm activation device that allows individuals to trigger an alarm in case of an emergency. Typically placed in easily accessible locations, it provides instant alerting for swift evacuation and response.

Siren Alarm Device

A loud, audible alarm system designed to alert occupants to emergencies such as fires or security breaches. Its high-decibel sound ensures quick response and evacuation in critical situations.

Beam Smoke Detector

An advanced smoke detection system that uses infrared beams to detect smoke over large areas. Ideal for high-ceiling spaces like warehouses and atriums, offering early fire detection in open environments.

Why Choose A&J Fire Control Services?

Complete Fire and Security Solutions

We provide a wide range of products, including fire protection devices, CCTV cameras, and fire suppression systems like FM200. Whether for homes or businesses, we have you covered.

High-Quality Products

We only use trusted, durable, and reliable products. From smoke detectors to fire alarms, everything we offer is built to last and perform when needed most.

24/7 Support

We offer round-the-clock support for maintenance, repairs, and emergencies, ensuring your systems are always ready.

Affordable and Reliable

We provide high-quality solutions at competitive prices, giving you the best value without sacrificing safety.

Proven Trust

We're trusted by clients across industries for our dedication to safety and customer satisfaction.

Latest Technology

We use cutting-edge fire and security technology, offering you the best in safety and convenience.

Commitment to Safety

Your safety is our priority. We are dedicated to providing reliable solutions that protect your people and property from fire and security risks.
